

## 2001 Thomas Bookmobile

**Sale Price: \$25,000 or best offer**

Size – 32 feet  
Weight – 14,000 pounds  
Mileage – 113,647  
Hours – 8,000

### Summary of Factors Affecting Current Condition

1. Generator nonfunctional.
2. Hydraulic step for staff and patron access nonfunctional and no longer attached. Sufficient frame to secure steps no longer available due to deterioration.
3. Electrolysis due to contact of non-alike metals evident on body. Possibly affecting condition of frame. Body is aluminum and frame and miscellaneous parts are steel.
4. Several batteries no longer hold a charge.
5. Frame bent making access to battery and generator slide out compartments questionable.
6. Roof leaks due to deteriorated gaskets between riveted seams.
7. Engine coolant tank.
8. Auxiliary heating and cooling systems subject to frequent costly breakdowns. (heating currently not working.)
